

SPL COMPILER - USER MANUAL

GROUP MEMBERS

- 1) Tkelo Mokwena - u22536800
- 2) Nigel Mofati - u22528084
- 3) Reneiloe Brancon - u22556771
- 4) Sibusiso Zotwayo - u22591380

HOW TO RUN

Command:

java -jar spl-compiler.jar <input.txt> [output.bas]

Examples:

java -jar spl-compiler.jar program.txt

java -jar spl-compiler.jar program.txt output.bas

Input: SPL program in .txt file

Output: Executable BASIC code in .bas file

MESSAGES

On success: COMPILATION SUCCESSFUL and <name>.bas is created

On error: "Lexical/Syntax/Naming/Type error: <details>"

TEST BASIC OUTPUT

Run the generated .bas using **PCBasic** or online: <https://www.calormen.com/jsbasic/>

NOTES

- If no output file is given, the compiler uses <input>_output.bas
- Ensure **Java 11+** is installed
